

ANNEX V – DATA CENTERS

Version: 01 April 2023

Data at rest is stored in secure data centers. We distinguish between Service Data, Platform Data and Support Data.

Service Data

Service Data covers data that is stored in the client environments (incl. Documents, Assets, Fonts, Data Sources, Previews, PDF output, ...).

CHILI publish leverages Microsoft AZURE data centers in different regions. The Customer can select a data center in a region, offered by CHILI publish (see Annex V – Data centers)

- **West-Europe** (The Netherlands - Amsterdam)
- **East US** (Virginia)
- **Australia East** (New South Wales)
- **South UK** (London)
- **France Central** (Paris)

Platform Data

Platform Data covers user account and subscription data (incl. contract details, credentials, permissions, ...).

Platform data is stored at rest in the Azure region West-Europe (The Netherlands, Amsterdam)

Support Data

Support Data covers the data customers provides via the CHILI publish support platform. Support Data is stored at rest in West Europe.

The data centers have been certified as ISO 27001, PCI/DSS Service Provider Level 1 and/or SOC 2 compliance.
