# 4 must-dos to match your Creative Tech stack to your customer journey goals

JASPER DE CRAECKER – Delivery Leader @Positive Thinking Company

# You can't execute on the Creative Automation mindset without adopting the right Creative Tech toolset

Wading through the All-out Phygital tech maze with your Creative Tech compass

# Value of Creative Automation @ PTC

- ... We help our clients digitalize their business processes
- ... Started out with traditional web 2 print solutions (ecommerce)
- ... Moving towards digital content creation with CHILI GraFx
- ... Our goal is to enable our clients to quickly adopt all GraFX features

# Must-do 1

Make it Data-centric

# #1 – Data-centric

- 1** ... Analyze your data sets and map it to creative content
- 2** ... Choose the right database system (flexibility is key)
- 3** ... Avoid manipulating data (lights out!)
- 4** ... Think about GDPR ;)

# Must-do 2

Make it Efficient

# #2 – Efficient

- 1** ... Creative Automation should empower creatives
- 2** ... Try to estimate the expected throughput
- 3** ... Determine template creation & maintenance effort
- 4** ... Dynamic output: sizes, localization & file formats

# Must-do 3

Make it Scalable

# #3 – Scalable

- 1 ... Myth: scalability costs money
- 2 ... Scale horizontally, not vertically
- 3 ... Choose the right infrastructure components
- 4 ... Rely on a resilient queueing system

# Must-do 4

Make it Connected

# #4 – Connected

- 1** ... Expose & consume APIs (REST, OpenGraph)
- 2** ... API Connection platforms (Boomi, Tray, Mulesoft, Prismatic)
- 3** ... Connect to workflow tools (Enfocus Switch, Power Automate, ...)
- 4** ... Reporting (PowerBI, Google Data Studio, ...)

# Who is Positive Thinking Company?

## Our Global Footprint

## Group Of Global Technology Specialists

Software Product  
Engineering

Security

Data & Analytics

Hyperautomation

Cloud

Digital Workplace

3600+ Coworkers

14 Key Partners
